

# Overhead Crane

## MC Light Crane System

The MC Light Crane System including various types of lifting equipment such as MC single girder suspension light crane, MC double girder suspension light crane, MC monorail suspension crane, MC flexible lightweight stacker and MC flexible lightweight cantilever crane, mainly works with MC chain hoist, can be widely used.

MC Light Crane System according to the station need of factory to establish specific logistics delivery plan, the system is suitable for almost any application conditions and circumstances, can be installed within the different structure of building, flexibly install and design. From point transport to the high accuracy of more point and more beat automated conveyor line, can be arbitrary combination, can make the best use of interior space height, into library, outbound, transport and access procedures which realized by one process, without other auxiliary tools. The system can be used in the design of the new plant, also can be used for the renovation and extension of the old system.

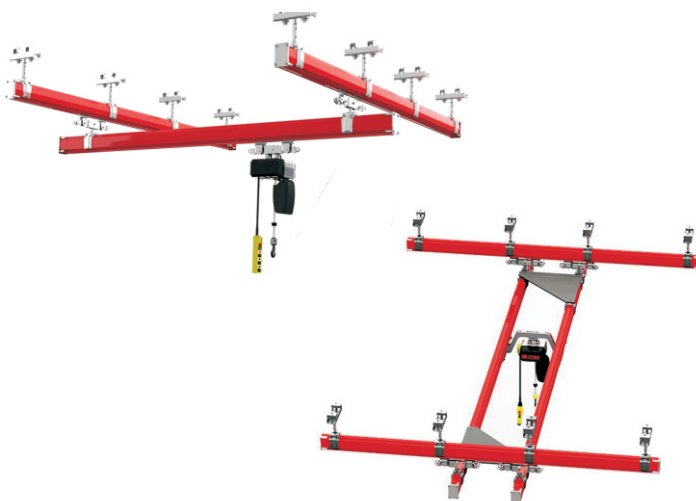

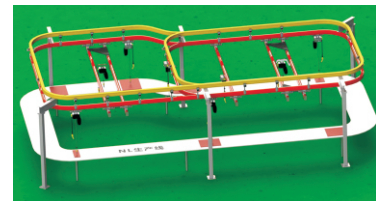

MC Light Crane System is convenient to install and debug. It can be used after a bolted connection between KBK profile and the standard module, it can greatly save space and area of the factory, to reduce the energy consumption and improve the efficiency of the enterprise. System can be manually operation, also can realize the automatic, semi-automatic operation.

The use condition of MC flexible light combined crane  
MC Light Crane System is applicable to general workshop, warehouse and the place which lifting materials below 3.2 t, lifting transportation demand environment temperature is 20 °C ~ + 60 °C.

**Product Type:**MC

**Lifting Capacity:** 80KG–3200KG

**Span Length:** 2–14M

### Features In General:

1. Reasonable installation size, light weight.
2. For small span and little load situation, can use MC single girder suspension light crane, our company can provide MC single girder suspension light crane which from 80 kg to 2000 kg, the length of the girder from 3 m to 9 m.  
High lifting height, large span, heavy lifting weight
3. In the case of large span and large lifting weight, we recommend using MC double girder suspension light crane, our company can provide MC double girder suspension light crane which from 80 kg to 3200 kg, the length of the girder from 4 m to 14m.
